Forecast for Thursday 08 Jun 2023

Weather: A risk of some early morning mist and cloud to start, mainly in the east, but this clearing quickly by mid-morning. Dry through the afternoon and evening with long-lived strong sunshine. Clear skies remaining to end the day but winds will start to strengthen becoming gusty into the evening.

Chance of cloud-free hill tops above 600m: 40% at first, though this risk mainly in the east, all areas increasing to 100% by mid-morning.

Low cloud and visibility: Cloud with bases between 300-400m in the east at first but these lifting and clearing by mid-morning to clear skies for the remainder of the day. Excellent visibility and good clarity for scenic viewpoints.

Meteorologist's View

It will be another warm day with high UV levels so it is important to think about taking precautions such as sunglasses, caps and sunscreen, and also to take plenty of water.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Friday 09 Jun 2023

Weather: Early morning mist and cloud to start, once again this will be mainly in the east, and should clear readily by mid-morning. Staying dry for most of the day with high cloud building from the south, creating more in the way of hazy sunshine. There is a risk of showers in the evening, possibly turning heavy and thundery much later and overnight.

Maximum wind: East northeasterly winds 25-30mph, gusting 30-35mph.

Chance of cloud-free hill tops above 600m: 40% at first (mainly in the east) rising quickly to 100%. Dropping to 70-80% into the late evening along with risk of showers.

Low cloud and visibility: A risk of bases around 300-400m with low cloud returning in the east during the early hours, before breaking up to leave cloud-free tops and excellent visibility.

Temperature: **Valleys:** Plus 7 Celsius, rising to plus 23 Celsius.
At 600m: Plus 3 Celsius, rising to plus 16 Celsius.
Freezing level: Above all summits
